The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest an injection shield including the three tanged toggle as set forth in claim 13, a method as set forth in claim 24 including changing the state of the syringe and removing the syringe by manipulating the toggle element as claimed, and an assembly a' set forth in claim 31 including a toggle including two tangs and a contact point as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 5,078,693, 5,599,318 and 5,584,814 teach related safety syringes and shield, none of which include the toggle element as claimed.
